

HANDLING OF CATS OF BOMBAY GYMKHANA

Dear Members,

1. There has been a recent solitary case of injury caused by a cat to a member's child. Although members are feeding the cats only in the designated areas and are effectively adhering to the Gymkhana rules, there remains a possibility of cats approaching members or rubbing against their legs while they are seated on the veranda, ground or other open spaces and jumping onto them, often out of affection or in response to encouragement.
2. Members, especially children, are requested to exercise greater caution and refrain from touching, handling or entertaining the cats, whether during feeding or otherwise, as such actions may result in injuries.
3. Kindly do note that all our cats are neutered and vaccinated for Rabies.

Thank you for your understanding and co-operation.
